FANG WEI JIE

Software Engineer · Full-Stack & Backend Development · SaaS & Fintech

Malaysia | fangweijie1123@gmail.com | linkedin.com/in/fangweijie | fang-wei-jie.github.io

SUMMARY

Software engineer with 3+ years of experience developing and enhancing SaaS applications, backend systems, RESTful APIs and fintech integrations. Works across backend and frontend using PHP, Laravel, TypeScript and Next.js, from payment workflows, automated bank feeds and e-invoicing to subscription and quota management. Enjoys practical engineering problems and collaborating with other engineers to deliver maintainable solutions.

SKILLS

Languages PHP, TypeScript, JavaScript, SQL

Backend Laravel, RESTful APIs, MySQL, third-party & payment integrations

Frontend Next.js, Ant Design

Prior experience Java, Spring Boot, Angular, Tailwind CSS

Tools & Practices PhpStorm, IntelliJ IDEA, OpenAPI & technical documentation, AI-assisted development (Claude, ChatGPT), technical support & production troubleshooting

EXPERIENCE

Software Engineer, Bukku — Apr 2023 – Present

Core platform & feature engineering

- Developed automated purchase bill payment and multi-channel sales synchronisation across POS and e-commerce, helping reduce manual data entry in accounting workflows.
- Contributed to revamping plan-based feature controls and usage limits to support subscription tiering and upselling.
- Contributed to refactoring the aging report architecture, expanding range-scoping capabilities while improving performance and maintainability.

Fintech & regulatory integrations

- Developed integration with Malaysia's LHDN MyInvois e-invoicing platform to support regulatory compliance for accounting users.
- Developed Maybank M2U Biz automated bank feeds with Smart Reconciliation to streamline bank transaction matching.
- Contributed to an embedded SME financing application portal in partnership with Funding Societies.

Architecture, migration & AI adoption

- Contributed to migrating the frontend to Next.js (from client-rendered React) while continuing to ship new features.
- One of three core engineers on the AI Tooling Task Force: evaluated LLMs (Claude, ChatGPT) and helped establish AI-assisted development workflows across the engineering organisation.

API documentation & developer support

- Maintain the public API documentation (OpenAPI) and advise external developers and integration partners on adapting the API to their business workflows, and troubleshoot integration issues.

Software Engineer, IT Specialist, iFAST Capital Sdn Bhd — Sep 2022 – Feb 2023

- Gathered requirements from business users, developed enhancements and provided application and data-correction support for the bond management and compliance learning assessment systems (Java, Spring Boot, Angular).
- Developed enhancements and add-ons for an external CRM system used to create and manage financial advisors' websites.

IT Partnership Intern, iFAST Capital Sdn Bhd — May 2022 – Aug 2022

- Developed enhancements for the compliance learning system and planned and developed a new module for the external CRM system for financial advisors' websites.

EDUCATION

New Era University College – B.Sc. (Hons) Software Engineering, CGPA 3.97 — Oct 2020 – Sep 2022

New Era University College – Diploma in Information Technology, CGPA 3.99 — May 2018 – Sep 2020

AWARDS

- Vice Chancellor's List, Lim Fong Seng Excellent Academic Award & Holistic Education Award (Bachelor's, 2022; Diploma, 2020), New Era University College
- International Special Award & Canadian Special Award, 7th International Invention Innovation Competition in Canada (iCAN), 2022
- Top 5 Finalist, ABB Intervarsity Innovation Challenge, 2018
